Portfolio : https://jeetuiux.github.io/portfolio/

UI / UX designer, Product Designer, and pretty curious human. Interested in creating simple, original, and impactful user experience and user interface. I want to explore opportunities to learn, grow, and create a multifold impact on my work using my skills.

Work Experience

iASYS Technonogy Solutions Pvt Ltd.   June 2021 –Present

UI / UX Designing Experience

- Utilized user-centered principles to ensure a quality user experience and coordinated with the team to refine the UI and UX of the application.

- Strong understanding of responsive design principles and mobile design

- Hands-on with Figma and Adobe Xd designing tools and Building working prototypes.

- Provide heuristic evaluations and reviews of early visual mockups or prototype designs and make recommendations to improve design and function.

- Problem-solving skills with an ability to research, analyze, empathize, competitive analysis and find solutions independently.

- Conducted 20+ user research sessions, including interviews, card Sorting, empathizing users, and surveys, to enhance user experience.

- Successfully designed and launched 10+ engaging and user-friendly digital interfaces for diverse clients and projects.

- Demonstrated expertise in information architecture, wireframing, and prototyping, leading to the development of 20+ interactive prototypes

- Adaptable and committed to delivering visually appealing and user-centric solutions

Development Experience

- 2.8 years experience as UI/UX Designer with skills in JavaScript, HTML, CSS, Bootstrap, Angular JS, Webix.

- Collaborated with cross-functional teams on 5+ projects, ensuring effective communication and alignment with project goals.

- Worked with a cross-functional team to find creative solutions for new marketing.

- Developed web applications using client-side web technologies like Javascript, AJAX, JQuery, CSS, and HTML. Aware of different JavaScript libraries used to develop web applications.

- Integration of multiple Projects, Bug fixing & manual testing of projects.

Projects

Combine brix application - Product Designer

- Combine brix application is a product of IASYS Technology solutions, which provides data management and product validation at one stop.
- Redesigned the entire product by enhancing the user interface and User experience, conducted various user-research like user interviews, competitive analysis, and card sorting.
- Proper collaboration with the development team and involvement in the development process for technical possibilities.

Emerson Electric - Lead Product designer

- I designed the product for Emerson Branson for welding data management with a clean user interface and improved user experience.
- Collaboration with US clients for a better understanding and requirements gathering

TransMotion Solutions - Lead UI / UX Designer

- Worked as a freelancer and designed UI / UX for a Business website company with proper communication and deadlines provided.
- Applied Design thinking strategy and standard design process phases like Brain storming / Empathizing with the user, Defining, ideating, prototyping, testing, iterating
